Downton Primary School Calculation Policy 2022

EYFS

Number – addition and subtraction | Number – multiplication and division

add two single digit numbers
aggregation
Counters on plates
1, 2, 3, 4,   5, 6.

Bead strings or bead bars can be used to illustrate addition including bridging ten by counting on 2 then 3.

5 + 3 = 8

1 2 3 4 5 6 7 8
5   6 7 8

subtract two single digit numbers
reduction
Counters on plates

6 take away 1 leaves
1, 2, 3, 4, 5.

Cross out drawn objects to represent what has been taken away:

3 take away 2 is 1

Start with 3 … 2, 1.

solve problems including doubling

Practically double a group of objects to find double of a number by combining then counting the two groups:

Double 4 is 8.

5 and 5

is 10

solve problems including halving and sharing

Sharing objects

One for you. One for me…
Is it fair? How many do we each have?

15 shared between 5 is 3.

Count on to find the answer
augmentation
Practically with objects, fingers etc.
5 + 2   "Put 5 in your head, 6, 7."

Dice…   4 + 3 = 7

4,   5, 6, 7.

On a prepared number line (start with the bigger number)…
2 + 4 = 6

0 1 2 3 4 5 6 7

Count on or back to find the answer

Practically, for example:

Group objects on a table then cover some to visualize the calculation:

2 less than 4 is 2

Start with 2… 3, 4.

Coins

I had 10 pennies. I spent 4 pence. How much do I have left? Start with 10… 9, 8, 7, 6.

Grouping objects

Put groups of objects on plates.

How many groups of 4 are there in 12 stars?

understand and use vocabulary for addition

add, more, and, make, sum, total, altogether, score, double, one more, two more, ten more… how many more to make… ? how many more is… than…?

is the same as

understand and use vocabulary for subtraction

take (away), leave, how many are left/left over? how many have gone? one less, two less… ten less… how many fewer is… than…? difference between

is the same as

understand and use vocabulary for multiplication

count on (from, to), count back (from, to), count in ones, twos… tens…

is the same as

understand and use vocabulary for division

half, halve, count out, share out, left, left over

is the same as

Number – addition and subtraction

Number – multiplication and division

represent and use number bonds up to 20

Start with number bonds to 10 then build. Use a wide range of objects (including fingers!) and images to model the bonds, e.g. interlocking cubes.

$0 + 7 = 7$ $7 = 7 + 0$
$1 + 6 = 7$ $7 = 6 + 1$
$2 + 5 = 7$ $7 = 5 + 2$
$3 + 4 = 7$ $7 = 4 + 3$

represent and use number bond facts related subtraction up to 20

Start with number bonds to 10 then build. Use a wide range of objects (including fingers!) and images to model the bonds, e.g. interlocking cubes.

$7 - 0 = 7$ $0 = 7 - 7$
$7 - 1 = 6$ $1 = 7 - 6$
$7 - 2 = 5$ $2 = 7 - 5$
$7 - 3 = 4$ $3 = 7 - 4$

add one-digit and two-digit numbers to 20, including zero

Bead strings or bead bars can be used to illustrate addition including bridging ten by counting on 2 then 3.

$8 + 5$

On a prepared number line... $7 + 4 = 11$

On a hundred square... $3 + 4$

subtract one-digit and two-digit numbers to 20, including zero

Practically with objects, fingers etc.
$5 - 2$ "Put 5 in your head, 4, 3."

Taking away
Number lines (numbered and unnumbered, prepared and child constructed)
Hundred Square
$17 - 3$

Finding the difference
Number lines (numbered and unnumbered, prepared and child constructed)

$+ 6$
Use practical equipment (such as numicon or cuisenaire) to identify the 'difference':

4
7

'The difference between 7 and 4 is 3' or 'Seven is 3 more than four'.

count in multiples of twos, fives and tens (from number and place value)

Counting using a variety of practical resources
Counting in 2s e.g. counting socks, shoes, animals in the ark...
Counting in 10s e.g. hundred square, towers of cubes...

Count in twos from zero

Count in fives from zero

Count in tens from zero
Use rhymes, songs and stories involving counting on and counting back in ones, twos, fives and tens.
Use 2p, 5p and 10p coins.

group and share small quantities

Practical activities involving sharing,
Distributing cards when playing a game, putting objects onto plates, into cups, hoops etc.

Grouping
Sorting objects into 2s / 3s/ 4s etc
How many pairs of socks are there?

There are 12 crocus bulbs. Plant 3 in each pot. How many pots are there?
Jo has 12 Lego wheels. How many cars can she make?

Sharing pictures /objects
12 children get into teams of 4 to play a game. How many teams are there?

Sweets are shared between 2 people. How many do they have each?

double numbers and quantities

Practically double a group of objects and/or quantities to find double of a number by combining then counting the two groups.
Progress onto using known facts and counting (in 1s, 2s, 5s and 10s) to double more efficiently.

10 and 10 is 20
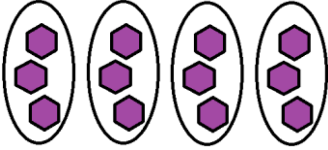

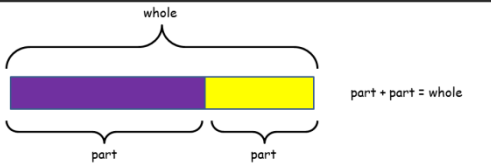

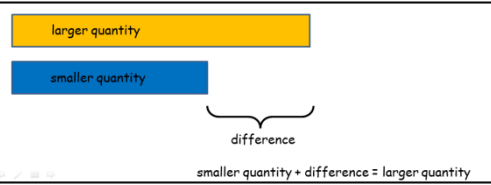

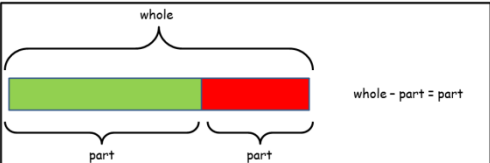

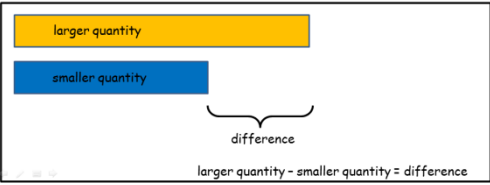

half numbers and quantities

Practically halve objects and/or qualities by sharing them out into two piles and then counting the number of objects in each pile, or cutting/folding pictures of objects in half.
Progress onto using known facts and counting (in 1s, 2s, 5s and 10s) to halve more efficiently.

Half of 8 is 4

|			
read, write and interpret mathematical statements involving addition (+) and equals (=) signs It is important to that children have a clear understanding of the concept of equality, before using the '=' sign. Calculations should be on either side of the '=' to that children don't misunderstand '=' as to mean 'the answer'. 15 + 2 = 17 15 = 3 + 12	read, write and interpret mathematical statements involving and subtraction (–) equals (=) signs It is important to that children have a clear understanding of the concept of equality, before using the '=' sign. Calculations should be on either side of the '=' to that children don't misunderstand '=' as to mean 'the answer'. 15 - 2 = 13 15 = 18 - 3	*make connections between arrays and number patterns* Arrays Looking at columns Looking at rows 2 + 2 + 2 3 + 3 3 groups of 2 2 groups of 3 Arrays and repeated addition 4 x 2 or 4 + 4 2 x 4 or 2 + 2 + 2 + 2	*make connections between arrays and number patterns* There are 4 groups of 3 in 12. 12 shared between 4 is 3.
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = [] + 4 To support this, when solving calculations, missing numbers should be placed in all possible places: 3 + 4 = ☐ ☐ = 4 + 3 3 + ☐ = 7 7 = ☐ + 4 4 + ☐ = 7 7 = 3 + ☐ ☐ + ∇ = 7 7 = ☐ + ∇ Use all the models and images mentioned above. Make models and images to display facts. Investigate related facts to 100 and repeat above.

Addition column

add numbers using concrete objects, pictorial representations, and mentally, including:
- a two-digit number and ones or tens

Counting on
$15 + 2$ "Put 15 in your head, 16, 17."

Partition number and recombine

$27 + 9 = 20 + 7 + 9$
$= 20 + 16$
$= 36$

Count on by splitting units to make next multiple of ten

$36 + 8 = 36 + 4 + 4$
$= 40 + 4$
$= 44$

Adding near numbers and adjusting

$33 + 9 = 33 + 10 - 1$

Hundred Square
$17 + 30$

- two two-digit numbers

Use empty number lines to add two 2 digits numbers, by counting on in multiples of ten then multiples of one.

$63 + 16 = 79$

Partition into tens and ones and recombine

$12 + 23 = 10 + 2 + 20 + 3$
$= 10 + 20 + 2 + 3$
$= 30 + 5$
$= 35$

Hundred Square
$32 + 23$

Refine to partitioning the second number only:

$23 + 12 = 23 + 10 + 2$
$= 33 + 2$
$= 35$

- adding three one-digit numbers
Use knowledge of adding, for example number bonds first or largest numbers first.

$3 + 9 + 7 = (3 + 7) + 9$
$= 10 + 9$
$= 19$

Subtraction column

subtract numbers using concrete objects, pictorial representations, and mentally, including:

- a two-digit number and ones or tens

Counting back

$63 - 20$ "Put 63 in your head, 53, 43."

Use unprepared numbered lines to subtract, by counting back in units:

$16 - 4 = 12$

Hundred Square
$43 - 30$

- two two-digit numbers

Use known number facts and place value to subtract (partition second number only)

$37 - 12 = 37 - 10 - 2$
$= 27 - 2$
$= 25$

Find a small difference by counting up
$42 - 39 = 3$

Subtract mentally a number near 10 to or from a two-digit number

$35 - 19 = 35 - 20 + 1$

Multiplication column

connect the 10 multiplication table to place value, and the 5 multiplication table to the divisions on the clock face

H	T	U
	1	0
	2	0
	3	0
	4	0

relate multiplication to arrays and to repeated addition using a range of materials and contexts

Practically combine groups of objects (2s, 5s and 10s) and verbalise (then record) what has been found out: There are 3 plates. Each plate has 2 star biscuits on. How many biscuits are there? 2 add 2 add 2 equals 6

Mum washed 5 pairs of socks, how many socks did she get out of the washing machine? $2 + 2 + 2 + 2 + 2 = 10$

Use arrays for repeated addition and relate this to the x calculation:
(Use counters or objects as well as visual representations to support understanding)

$5 + 5 + 5 = 15$ $3 + 3 + 3 + 3 + 3 = 15$

$5 \times 3 = 15$ $3 \times 5 = 15$
Use a number line for repeated addition:

3 lots of 6
$6 \times 3 = 18$

Division column

connect the 10 multiplication table to place value, and the 5 multiplication table to the divisions on the clock face

H	T	U
	1	0	0
	2	0	0
	3	0	0
	4	0	0

relate division to grouping and sharing discrete and continuous quantities, to arrays and to repeated subtraction using a range of materials and contexts

Initially, pupils to practically 'share' and 'group' using practical equipment and pictorial representation. Move on to using arrays to identify groups, use physical counters before pictorial representations:

How many groups of 3 are in 15?
Grouping using a number line:

There are 30 children in the class, how many groups of 5 can we get into?
Use counters to support pupils understanding:

Record in columns row

record addition and subtraction in columns

Use partitioned column method.

Solve calculations that do not cross the tens boundary, until they are secure with the method. Then solve calculations that do cross the tens boundary. Use base 10 (diennes) to support the understanding of 'carrying' and the value of 'digits'.

$20 + 3$
$+ 30 + 4$
$50 + 7$

$20 + 8$
$+ 10 + 3$
$40 + 1 = 40$
10
$= 57$

$28 + 13$

record subtraction in columns

Introduce partitioned column method where no exchanging is required:

$46 - 22 = 24$

$40 + 6$
$- 20 + 2$
$20 + 4$

use base 10 (diennes) to support understanding

calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (×) and equals (=) signs

$3 \times 4 = 12$

Repetition of sentence with different vocabulary:

"3 times 4 equals 12"

"3 lots of 4 are 12"

"3 multiplied by 4 equals 12"

"The product of 3 and 4 is 12"

calculate mathematical statements for division within the multiplication tables and write them using the division (÷) and equals (=) signs
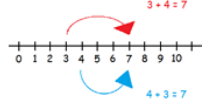

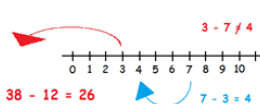

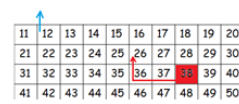

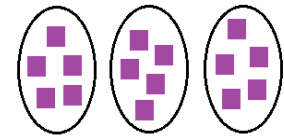

$12 ÷ 4 = 3$

Repetition of sentence with different vocabulary:

"12 divided by 4 equals 3"

"12 shared by 4 is 3"

"12 grouped into 4s is 3"

solve problems with addition:	solve problems with subtraction:	solve problems involving multiplication, using materials, arrays, repeated addition, mental methods, and multiplication facts, including problems in contexts	solve problems involving division, using materials, arrays, repeated addition, mental methods, and division facts, including problems in contexts

solve problems with addition:
- using concrete objects and pictorial representations, including those involving numbers, quantities and measures
- applying increasing knowledge of mental and written methods

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

whole
part + part = whole
part   part

larger quantity
smaller quantity
difference
smaller quantity + difference = larger quantity

---

solve problems with subtraction:
- using concrete objects and pictorial representations, including those involving numbers, quantities and measures
  applying increasing knowledge of mental and written methods
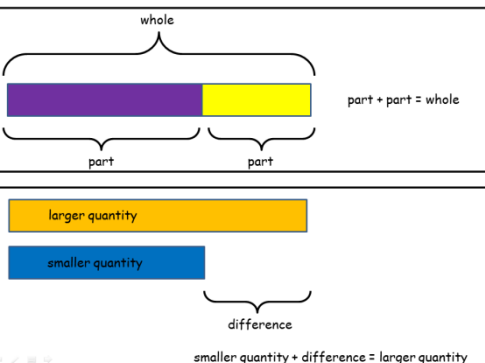

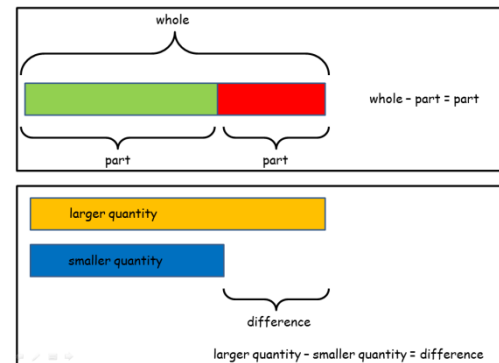

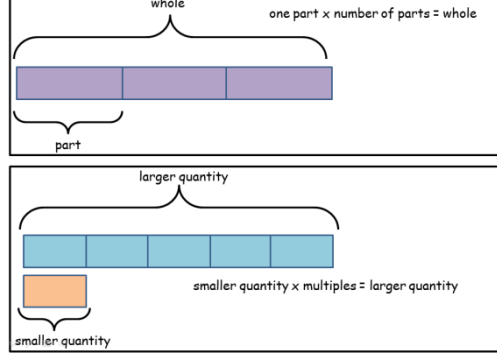

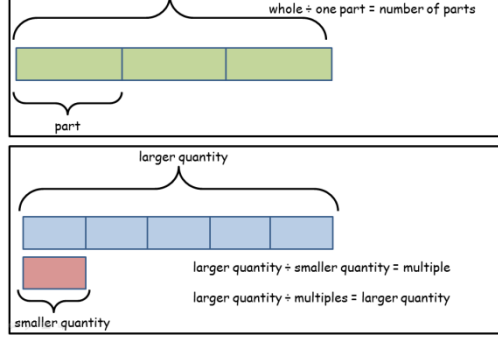

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

whole
whole – part = part
part   part

larger quantity
smaller quantity
difference
larger quantity – smaller quantity = difference

---

solve problems involving multiplication, using materials, arrays, repeated addition, mental methods, and multiplication facts, including problems in contexts

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

whole
one part x number of parts = whole
part

larger quantity
smaller quantity x multiples = larger quantity
smaller quantity

---

solve problems involving division, using materials, arrays, repeated addition, mental methods, and division facts, including problems in contexts

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

whole
whole ÷ number of parts = one part
whole ÷ one part = number of parts
part

larger quantity
larger quantity ÷ smaller quantity = multiple
larger quantity ÷ multiples = larger quantity
smaller quantity

---

recognise and use the inverse relationship between addition and subtraction and use this to solve missing number problems

Missing numbers placed in all possible places.

$7 - 3 = \square$ $\square = 4 + 3$
$7 - \square = 4$ $7 = \square + 3$
$\square - 3 = 4$ $7 = 4 + \square$
$\square - \nabla = 4$ $7 = \square + \nabla$

Number lines
$7 + 4 = 11$ $11 - 4 = 7$

6 7 8 9 10 11 12

As Year 1 and extend to
$14 + 5 = 10 + \square$
$17 - 5 = 14 - \square$

and three numbers
$32 + \square + \square = 100$
$35 = 46 - \square - 7$

recognise and use the inverse relationship between multiplication and division and use this to solve missing number problems

$3 \times 5 = 15$ $15 \div 3 = 5$

$5 \times 3 = 15$ $15 \div 5 = 3$

---

show that addition of two numbers can be done in any order (commutative)

On a number line
$3 + 4 = 7$
$4 + 3 = 7$
0 1 2 3 4 5 6 7 8 9 10

$26 + 12 = 38$

On a hundred square

$12 + 26 = 38$

show that subtraction of two numbers cannot be done in any order

On a number line
$3 - 7 \neq 4$
$7 - 3 = 4$
0 1 2 3 4 5 6 7 8 9 10

$12 - 38 \neq 26$ $38 - 12 = 26$

On a hundred square

show that multiplication of two numbers can be done in any order (commutative)

$5 \times 3 = 15$

$3 \times 5 = 15$

show that division of one number by another cannot be done in any order

$15 \div 5 = 3$

$5 \div 15 \neq 3$

---

check their calculations, including adding numbers in a different order to check addition (for example, 5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5) - establishing commutativity and associativity of addition

See models and images above.

check their calculations, including by adding to check subtraction

See models and images above.

---

recognise and use the inverse relationship between addition and subtraction and use this to check calculations

See models and images above.

recognise and use the inverse relationship between addition and subtraction and use this to check calculations

See models and images above.

use commutativity and inverse relations to develop multiplicative reasoning (for example, 4 × 5 = 20 and 20 ÷ 5 = 4)

Arrays – related facts

$3 \times 5 = 15$ $15 \div 3 = 5$
$5 \times 3 = 15$ $15 \div 5 = 3$

---

extend their understanding of the language of addition to include sum

+, add, more, plus, make, sum, total, altogether, score, double, near double, one more, two more… ten more, How many more to make…? How many more is… than…? How much more is…? Repetition of facts with different vocabulary:
"What is 2 add 5?"   "What is 2 more than 5?"
"What is 2 plus 5?"   What is the total of 2 and 5?" etc

= equals, sign, is the same as

extend their understanding of the language of subtraction to include difference

- subtract, subtraction, take (away), minus, leave, how many are left/left over? one less, two less… ten less… one hundred less, how many fewer is… than…? how much less is…? difference between, half, halve, tens boundary
$13 + 5 = 8$ Repetition of sentence with different vocabulary:
"13 subtract 5 equals 8"   "5 less than 13 is 8"
"13 take away 5 equals 8"   "The difference between 13 and 5 is 8" etc

= equals, sign, is the same as

use a variety of language to describe multiplication

count on (from, to), count back (from, to), count in ones, twos, threes, fours, fives… count in tens, lots of, groups of, x, times, multiply, multiplied by, multiple of, once, twice, three times… ten times… times as (big, long, wide… and so on), repeated addition, array, row, column, double, halve

= equals, sign, is the same as

use a variety of language to describe division

Array, row, column, halve, share, share equally, one each, two each, three each… group in pairs, threes… tens, equal groups of, ÷, divide, divided by, divided into, left, left over

= equals, sign, is the same as

Year 3

Number – addition and subtraction | Number – multiplication and division

Number – addition and subtraction

add numbers mentally, including:
- a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds

Counting on	Adding near numbers and adjusting
115 + 2 "Put 115 in your head, 116, 117."	433 + 90 = 433 + 100 – 10 = 533 – 10 = 523
Partition number and recombine 127 + 90 = 100 + 20 + 7 + 90 = 100 + 110 + 7 = 100 + 117 = 217	Count on by splitting units to make next multiple of ten/hundred 360 + 80 = 360 + 40 + 40 = 400 + 40 = 440

- two two-digit numbers (including answer crossing 100)

Counting on with number lines	Partition both numbers and recombine
48 + 36 = 84 48 78 80 84	27 + 82 = 20 + 7 + 80 + 2 = 100 + 9 = 109
Add the nearest multiple of 10, then adjust 63 + 59 is the same as 63 + 60 - 1	Count on by partitioning the second number only 36 + 93 = 93 + 30 + 6 = 123 + 6 = 129

add numbers with up to three digits, using formal written methods of columnar addition (*See Appendix 1*)

Extend mental method of partitioning and recombining. 158 + 72 = 100 + (50 + 70) + (8 + 2) = 100 + 120 + 10 = 230	Vertical expansion 367 +185 12 140 400 552
Column addition 367 +185 552 11	Including money £ 2.50 + £ 1.75 £ 4.25 1

Exchange 10 tens for 1 hundred and group with the hundreds.

Use base 10 (diennes) or place value counters to support understanding of carrying and to ensure conceptual understanding of place value:

If children are experiencing persistent difficulties, they could use the partitioned column method with carrying (using Diennes for support):

200 + 40 + 6
70 + 6
300 + 20 + 2
100   10

(subtraction column)

subtract numbers mentally, including:
- a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds

Counting back: 263 - 5 "Put 263 in your head, 262, 261, 260, 259, 258." Subtract mentally a 'near multiple of 10' to or from a two-digit number: 678 – 90 = 678 – 100 + 10	Use unprepared numbered lines to subtract, by counting back: 516 – 400 = 116 116 216 316 416 516 -100 -100 -100 -100

- two two-digit numbers (including answer crossing 100)

Use known number facts and place value to subtract (partition second number only) 37 – 12 = 37 – 10 – 2 = 27 – 2 = 25 25 27 37	Find a small difference by counting up 42 – 39 = 3 + 1 + 2 39 40 42
	Subtract mentally a number near 10 to or from a two-digit number 35 – 19 = 35 – 20 + 1 +1 15 16 35 -20

subtract numbers with up to three digits, using formal written methods of columnar subtraction (*See Appendix 1*)

Use base 10 (diennes) as a practical method to introduce exchanging

31 – 18 = 13

When pupil(s) are confident in doing this practically and verbalizing the calculation, begin to record using partitioned column method:

20   1
30 + 1
-10 + 8
10 + 3

When using exchanging, use partitioned column method to solve calculations involving 3 digit numbers. Repeating the practical stage if necessary.

Introduce Column Subtraction without decomposition:

458
- 232
226

Number – multiplication and division

recall and use multiplication facts for the 3, 4 and 8 multiplication tables

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

understand and use mental methods using commutativity and associativity (for example, 4 × 12 × 5 = 4 × 5 × 12 = 20 × 12 = 240)

Use a variety of resources (including a calculator) to investigate order of multiplication.
Make models and images to display facts.

understand and use mental methods using multiplication a facts (e.g. using 3 × 2 = 6, 6 ÷ 3 = 2 and 2 = 6 ÷ 3) to derive related facts (e.g. 30 × 2 = 60, 60 ÷ 3 = 20 and 20 = 60 ÷ 3)

30 × 5 = 150	50 × 3 = 150	150 ÷ 5 = 30	150 ÷ 3 = 50
3 × 5 = 15			15 ÷ 3 = 5
3 × 50 = 150			150 ÷ 30 = 5
5 × 3 = 15			15 ÷ 5 = 3
5 × 30 = 150	50 × 30 = 1500	30 × 50 = 1500	150 ÷ 50 = 3

develop reliable written methods for multiplication, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short multiplication

Start by reinforcing mental methods of partitioning:

15 × 2 = 30   15 × 2   13 × 3 = (10 × 3) + (3 × 3)
   20 + 10 = 30   = 30 + 9
     = 39

Grid Method

1. Introduce the grid method by linking it to arrays initially (using counters):

12 × 3 = 36

×	3
10	30
2	6
	36

2. Use base 10 (diennes) with grid method to support understanding of place value:

12 × 3 = 36

×	3
10	30
2	6
	36

3. Use the grid method:

×	3
10	30
3	9
	39

(division column)

recall and use division facts for the 3, 4 and 8 multiplication tables

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.
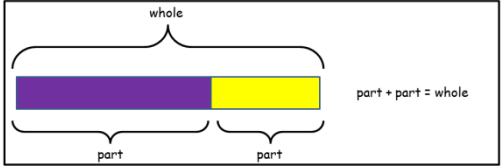

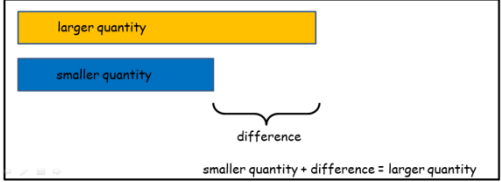

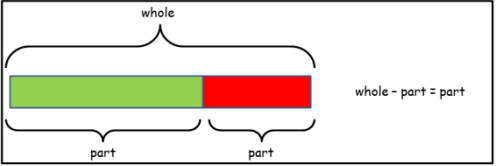

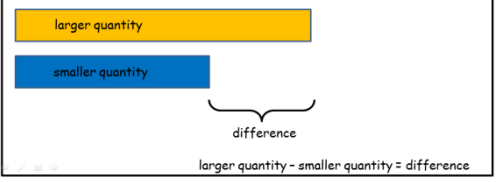

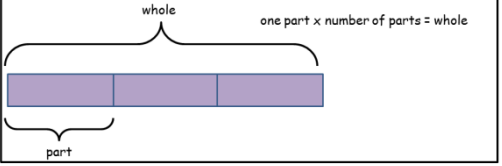

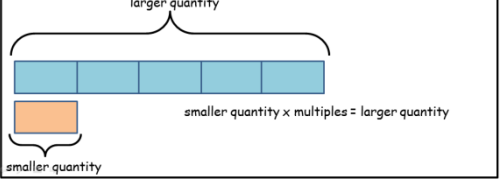

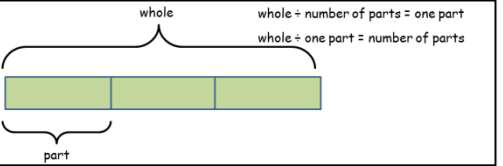

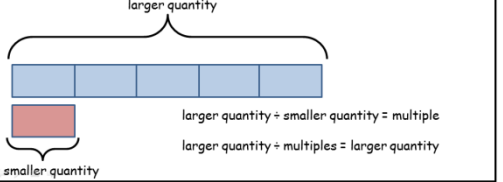

develop reliable written methods for division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short division

Use counters and a number line to support pupils understanding, Number lines How many 3's make 18? 0 3 6 9 12 15 18 Hoops and dots 16 ÷ 2 = 8	Move on to calculations that leave remainders and/or require tables knowledge: 1) 16 ÷ 3 = 5 r 1 2) 69 ÷ 3 = 23 3 × 10 3 × 10 3 × 3 0 30 60 69

When pupils have had experience with and demonstrated understanding of grouping for division, begin to look at short division with no remainders in the final answer.

Use counters/Diennes to support understanding.

Number – addition and subtraction | Number – multiplication and division
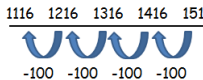

Number – addition and subtraction

add numbers mentally, including:
- a four-digit number and ones
- a four-digit number and tens
- a four-digit number and hundreds
- a four-digit number and thousands

| Counting on	Adding near numbers and adjusting
$3115 + 2$ "Put 3115 in your head, 3116, 3117."	$7433 + 90 = 7433 + 100 - 10$ $= 7533 - 10$ $= 7523$
Partition number and recombine $5127 + 2000$ $= 5000 + 100 + 20 + 7 + 2000$ $= 7000 + 100 + 20 + 7$ $= 7127$	Count on by splitting units to make next multiple of ten/hundred $2360 + 500 = 2360 + 400 + 40 + 60$ $= 2400 + 400 + 60$ $= 2860$

- three and two-digit numbers

Partition both numbers into hundreds, tens and ones and recombine	Partition second number only into hundreds, tens and ones and recombine
$358 + 73 = 300 + 50 + 8 + 70 + 3$ $= 300 + 120 + 11$ $= 420 + 11$ $= 431$	$358 + 73 = 358 + 70 + 3$ $= 428 + 3$ $= 431$
Partitioning with number lines +70 +3 358 428 431	Add the nearest multiple of 10 or 100, then adjust $458 + 79 = 458 + 80 - 1$

subtract numbers mentally, including:
- a four-digit number and ones
- a four-digit number and tens
- a four-digit number and hundreds
- a four-digit number and thousands

Counting back: 5263 - 5 "Put 5263 in your head, 5262, 5261, 5260, 5259, 5258." Subtract mentally a 'near multiple of 10' to or from a two-digit number: $3678 - 90 = 3678 - 100 + 10$	Use unprepared numbered lines to subtract, by counting back: $1516 - 400 = 1116$ 1116 1216 1316 1416 1516 -100 -100 -100 -100

- three and two-digit numbers

Use known number facts and place value to subtract (partition second number only) $437 - 12 = 437 - 10 - 2$ $= 427 - 2$ $= 425$ 425 427 437 -2 -10	Find a small difference by counting up $6003 - 5998 = 5$ +2 +3 5998 6000 6003 Subtract mentally a number near 10 to or from a two-digit number $305 - 19 = 305 - 20 + 1$ +1 285 286 305 -20

Number – multiplication and division

recall multiplication facts for multiplication tables up to 12 × 12

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

use place value, known and derived facts to multiply mentally, including: multiplying by 0 and 1; multiplying together three numbers
practise and extend mental methods to three-digit numbers to derive facts, (for example 600 ÷ 3 = 200 can be derived from 2 × 3 = 6)

Use knowledge of multiplication facts and place value to derive related facts.

$30 \times 5 = 150$	$50 \times 3 = 150$	$150 \div 5 = 30$	$150 \div 3 = 50$
	$3 \times 5 = 15$	$15 \div 3 = 5$	
$3 \times 50 = 150$			$150 \div 30 = 5$
	$5 \times 3 = 15$	$15 \div 5 = 3$	
$5 \times 30 = 150$	$50 \times 30 = 1500$	$30 \times 50 = 1500$	$150 \div 50 = 3$

Partition
$18 \times 9 = (10 \times 9) + (8 \times 9)$
$= 90 + 72$
$= 162$

recall division facts for multiplication tables up to 12 × 12

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

use place value, known and derived facts to divide mentally, including: dividing by 1
practise and extend mental methods to three-digit numbers to derive facts, (for example 600 ÷ 3 = 200 can be derived from 2 × 3 = 6)

Use knowledge of multiplication facts and place value to derive related facts.

$30 \times 5 = 150$	$50 \times 3 = 150$	$150 \div 5 = 30$	$150 \div 3 = 50$
	$3 \times 5 = 15$	$15 \div 3 = 5$	
$3 \times 50 = 150$			$150 \div 30 = 5$
	$5 \times 3 = 15$	$15 \div 5 = 3$	
$5 \times 30 = 150$	$50 \times 30 = 1500$	$30 \times 50 = 1500$	$150 \div 50 = 3$

Partitioning/Chunking
$77 \div 5 = (50 \div 5) + (25 \div 5) + (\text{remainder } 2)$
$= 10 + 5 + (\text{remainder } 2)$
$= 15 \text{ remainder } 2$

recognise and use commutativity in mental calculations
write statements about the equality of expressions (for example, use the distributive law 39 × 7 = 30 × 7 + 9 × 7 and associative law (2 × 3) × 4 = 2 × (3 × 4))

Use a variety of resources (including a calculator) to investigate order of multiplication. Make models and images to display facts.

recognise and use factor pairs in mental calculations

Use a variety of resources (including a calculator) to investigate factor pairs. Make models and images to display facts.

---

add numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate (see Appendix 1)

Column addition

```
  2358
+  373
  2731
    11
```

To ensure conceptual understanding, it is essential that place value is reinforced by frequently.
Discussing the actual value of each digit, e.g. the 5 digit represents 5 hundreds.

Use base 10 (Diennes) or place value counters to support understanding of carrying and to ensure conceptual understanding of place value (see year 2 and 3 for how to use these manipulatives).

Including decimals

```
  72.8
+ 54.6
 127.4
    1
```

To ensure conceptual understanding, it is essential that place value is reinforced by frequently discussing the actual value of each digit, e.g. the 2 digit represents 2 tens.

Use money to support understanding.

subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate (see Appendix 1)

Revision of partitioned column method from Year 3. Moving on to numbers with 4 digits: (use Diennes to support when required.)

$$2754 - 1562 = 1192$$

```
 2000 + 700 + 50 + 4
          600
- 1000 + 500 + 60 + 2
 1000 + 100 + 90 + 2
```

Column Subtraction without decomposition
```
  458
- 232
  226
```

Column Subtraction with decomposition
Once pupils are confident in exchanging and have a clear understanding of place value, move towards the formal compact column method: (use Diennes to support when required.)

```
  2⁶7̶54
- 1562
  1192
```

multiply two-digit and three-digit numbers by a one-digit number using formal written layout (see Appendix 1)

Grid method
231 x 7 is approximately 200 x 10 = 2000

$231 \times 7 = 1617$

×	7
200	1400
30	210
1	7
	1617

+

move onto formal method of short multiplication when proficient

```
  452
×   3
 1356
   1
```

divide numbers up to 3 digit by a one-digit number using the formal written method of short division and begin to interpret remainders.

Short division with no remainders in the final answer, use place value counters/Diennes where support is required.

```
  037
5)1⁸3⁵
```
```
  218
4)8⁷3²
```

Remainders
Begin to interpret remainders by looking at word problems to give context and small numbers to start with.

Cars carry 5 people. !2 people are going on a trip. How many cars will they need?
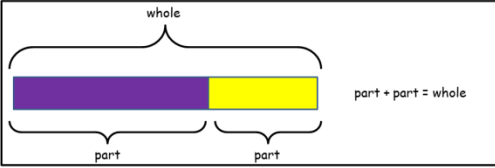

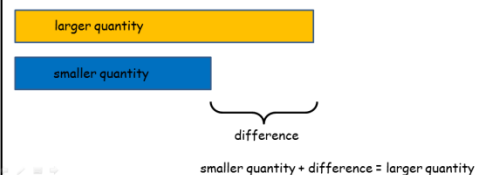

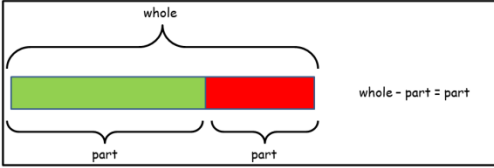

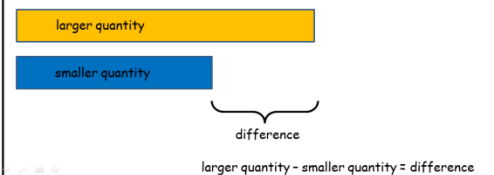

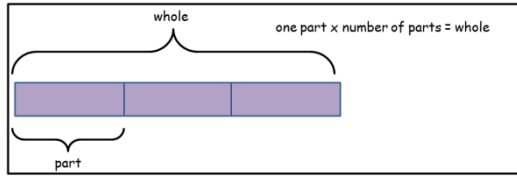

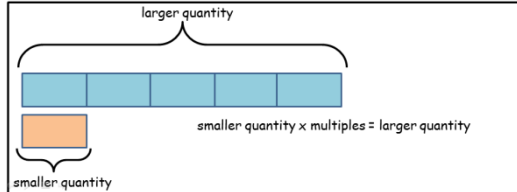

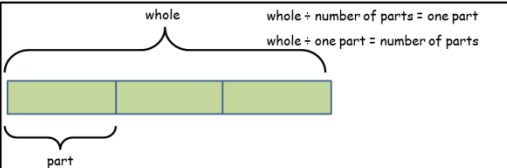

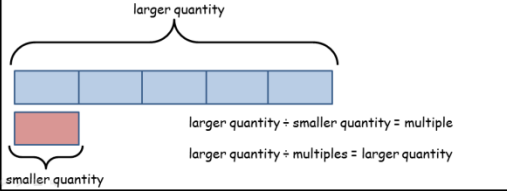

$12 \div 5 = 2 \text{ r } 2$ So they would need 3 cars.

5 buttons are packed in a bag. How many full bags would there be if there were 12 buttons?

$12 \div 5 = 2 \text{ r } 2$. So there are 2 full bags.

solve addition two-step problems in contexts, deciding which operations and methods to use and why	solve subtraction two-step problems in contexts, deciding which operations and methods to use and why	solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	*solve two-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers*

| *use a variety of language to describe addition*	*use a variety of language to describe subtraction*	*use a variety of language to describe multiplication*	*use a variety of language to describe division*
+ add, addition, more, plus; increase, sum, total, altogether, score, double, near double, how many more to make…? tens boundary, hundreds boundary, inverse = equals, sign, is the same as	- subtract, subtraction, take (away), minus, decrease, leave, how many are left/left over? difference between, half, halve, how many more/fewer is… than…? how much more/less is…? tens boundary, hundreds boundary, inverse = equals, sign, is the same as	times, multiply, multiplication, multiplied by, multiple of, product once, twice, three times… ten times… times as (big, long, wide… and so on) repeated addition array, row, column, double, inverse = equals, sign, is the same as	Array, row, column, halve, share, share equally, one each, two each, three each… group in pairs, threes… tens. equal groups of, divide, division, divided by, divided into, remainder, factor, quotient, divisible by, inverse = equals, sign, is the same as

Number – addition and subtraction | Number – multiplication and division

---

add numbers mentally with increasingly large numbers (e.g. 12 462 – 2300 = 10 162)

Partition both numbers and recombine

2358 + 773
= 2000 + 300 + 50 + 8 + 700 +70 + 3
= 2000 + 1000 + 120 + 11
= 3000 + 100 + 30 + 1
=3131
Partitioning with number lines

```
        +700      +70    +3
   2358      3058    3128 3131
```

Partition second number only into hundreds, tens and ones and recombine

2358 + 773 = 2358 + 700 + 70 + 3
           = 3058 + 70 + 3
           = 3128 + 3
           = 3131

Add the nearest multiple of 10 or 100, then adjust
458 + 79 = 458 + 80 - 1

---

subtract numbers mentally with increasingly large numbers (e.g. 12 462 – 2300 = 10 162)
Subtract the nearest multiple of 10 or 100, then adjust

458 – 79 = 458 - 80 + 1
          = 378 + 1
          = 379

Find a difference by counting up

8006 - 2993 = 5013

```
      +7        + 5000         + 6
   2993  3000            8000  8006
```

Use known number facts and place value to subtract (partition second number only)

12 462 – 2300
      = 12 462 – 2000 – 300
      = 10 462 – 300
      = 10 162

```
   10162    10462       12462

       -300       -2000
```

---

multiply numbers mentally drawing upon known facts

Partition

$47 \times 6 = (40 \times 6) + (7 \times 6)$
$\quad = (240) + (42)$
$\quad = 282$

Double and halve

$25 \times 16 = 50 \times 8 = 100 \times 4 = 200 \times 2 = 400$

---

multiply whole numbers and those involving decimals by 10, 100 and 1000
Place Value

identify multiples, (and use them to construct equivalence statements, e.g. 4 x 35 = 2 x 2 x 35; 3 x 270 = 3 x 3 x 9 x 10 = 9² x 10))

Use a variety of resources (including a calculator) to investigate multiples. Make models and images to display facts.

recall prime numbers up to 19
establish whether a number up to 100 is prime

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within primes.

recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³)

Use a variety of resources (including a calculator) to investigate square and cubed numbers. Make models and images to display facts.
Investigate the patterns within squared and cubed numbers.

---

divide numbers mentally drawing upon known facts

Partitioning

$72 \div 3 = (60 \div 3) = (12 \div 3)$
$\quad = 20 + 4$
$\quad = 24$

---

divide whole numbers and those involving decimals by 10, 100 and 1000
Place Value

identify factors, including finding all factor pairs of a number, and common factors of two numbers (and use them to construct equivalence statements, e.g. 4 x 35 = 2 x 2 x 35; 3 x 270 = 3 x 3 x 9 x 10 = 9² x 10))

Use a variety of resources (including a calculator) to investigate factors. Make models and images to display facts.

recall prime numbers up to 19
establish whether a number up to 100 is prime

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within primes.

---

add numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction – see Appendix 1)

Column addition

```
    124.90    (add in a zero to keep
 + 117.25      the place value)
   242.15
       11
```

To ensure conceptual understanding, it is essential that place value is reinforced by frequently.
Discuss the value of each digit.
Use base 10 (Diennes) to support understanding of exchanging and to ensure conceptual understanding of place value.
Where there is an 'empty' space in a decimal column, pupils should insert a zero to show the value.
Children should be made aware that it is essential to align the columns carefully.

Pupils should be able to add more than 2 numbers using the compact column method.

```
    3.25
  + 4.13
    0.76
    8.14
    1 1
```

---

subtract numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction – see Appendix 1)

Revision of **formal compact column method** extending to calculations involving numbers with more than 4 digits (use Diennes to support understanding of decomposition and place value).

```
   ²3̶ ¹7̶ ⁰0̶ ⁸3̶ 6
 -     2 1 2 8
   2 8 , 9 2 8
```
When confident in using **formal compact column method** with integers and decimals involving money (always 2 decimal places), extend to subtraction with mixtures of integers and decimals. A clear understanding of place value is essential. Align the decimal point and use '*place holders*', if needed.

```
      ⁵2̶ ¹1̶ 1
 -   263.0
      26.5
     236.5
```

Use Diennes or place value counters (add counters with 0.1) to support understanding of decomposition and place value.

---

multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers
Review formal method of short multiplication (for multiplying by one digit numbers) when proficient

```
    452          1243
  X   3        X    8
   1356         9624
      1         1 3 2
```

Start with grid method when multiplying by 2 digit numbers
72 x 38 is approximately 70 x 40 = 2800

x	70	2
30	2100	60
8	560	16

```
 2160
  576
 2736
    1
```

Move onto formal long multiplication

```
    34
  X 13
   102
      1
   340
   442
```

Then formal multiplication with more complex numbers:

```
   1234
     16
   7404
  12340
  19,744
```

---
divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context (as fractions, as decimals or by rounding (for example, 98 ÷ 4 = 98/4 = 24 r 2 = 24 ½ = 24.5 ≈ 25))

Bus shelter method (short division)
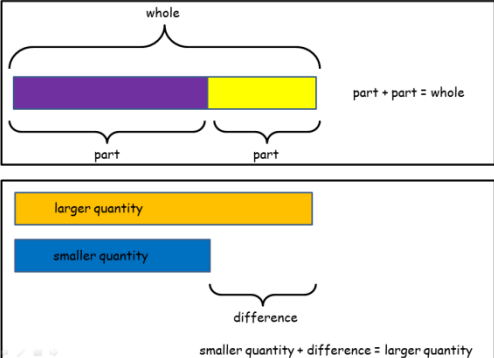

```
     8 6 r 2
       3
 5 | 4 3 2
```
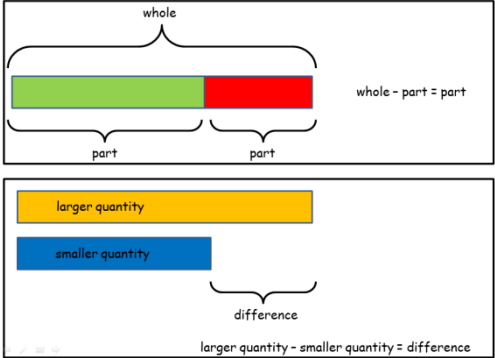

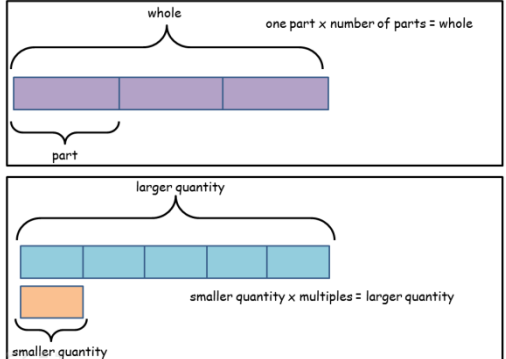

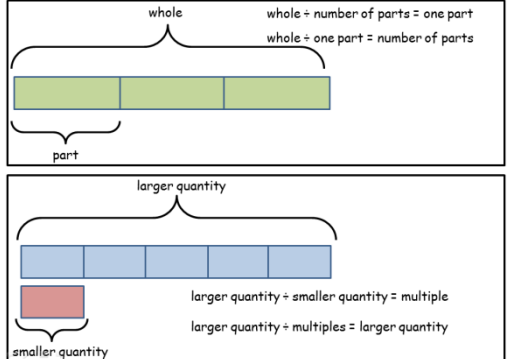

Pupils should consider whether remainders should be left as a reminder, rounded to the nearest whole or converted into a decimal or fraction.

```
     114.25
 4 | 457.¹0 ²0
```

Introduce long division (dividing by single digits)

$256 \div 7$ lies between $210 \div 7 = 30$ and $280 \div 7 = 40$

```
     256
  -   70    (10 groups)  or (10 x 7)
     186
     140    (20 groups)  or (20 x 7)
      46
  -   42    (6 groups)   or (6 x 7)
       4    (36 groups)  or (36)
```

Answer: 36 remainder 4

solve addition multi-step problems in contexts, deciding which operations and methods to use and why	solve subtraction multi-step problems in contexts, deciding which operations and methods to use and why	Solve problems that use multiplication and division as inverses, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of a 1000 in converting between units such as kilometres and metres	Solve problems that use multiplication and division as inverses, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of a 1000 in converting between units such as kilometres and metres

use a variety of language to describe addition + add, addition, more, plus, increase, sum, total, altogether, score, double, near double, how many more to make…? tens boundary, hundreds boundary, units boundary, tenths boundary, inverse = equals, sign, is the same as	use a variety of language to describe subtraction - subtract, subtraction, take (away), minus, decrease, leave, how many are left/left over? difference between, half, halve, how many more/fewer is… than…? how much more/less is…? tens boundary, hundreds boundary, units boundary, tenths boundary, inverse = equals, sign, is the same as	use a variety of language to describe multiplication know and use the vocabulary of prime numbers, prime factors and composite (nonprime) numbers lots of, groups of, times, multiply, multiplication, multiplied by, multiple of, product, once, twice, three times… ten times… times as (big, long, wide… and so on), repeated addition, array, row, column, double,, inverse, prime, equals, sign, is the same as	use a variety of language to describe division Array, row, column, halve, share, share equally one each, two each, three each… group in pairs, threes… tens, equal groups of, divide, division, divided by, divided into, remainder, factor, quotient, divisible by, inverse. Prime, factors equals, sign, is the same as

| Number – addition and subtraction		Number – multiplication and division	
perform mental calculations, including with mixed operations and large numbers *(and decimals)* Partition both numbers into hundreds, tens, ones and decimal fractions and recombine $$35.8 + 7.3 = 30 + 5 + 0.8 + 7 + 0.3$$ $$= 30 + 12 + 1.1$$ $$= 42 + 1.1$$ $$= 43.1$$ Partition second number only into hundreds, tens, ones and decimal fractions and recombine $$35.8 + 7.3 = 35.8 + 7 + 0.3$$ $$= 42.8 + 0.3$$ $$= 43.1$$ Add the nearest whole number then adjust $$52 + 11.9 = 52 + 12 - 0.1$$ $$= 64 - 0.1$$ $$= 63.9$$	perform mental calculations, including with mixed operations and large numbers*(and decimals)* Use known number facts and place value to subtract $$6.1 - 2.4 = 3.7$$ 3.7 4.1 6.1 -0.4 -2 Subtract the nearest whole number then adjust $$52 - 11.9 = 52 - 12 + 0.1$$ $$= 40 + 0.1$$ $$= 40.1$$	perform mental calculations, including with mixed operations and large numbers*(and decimals)* Partitioning $$4.7 \times 6 = (4 \times 6) + (0.7 \times 6)$$ $$= (24) + (4.2)$$ $$= 28.2$$ Double and halve $$4.25 \times 32 = 8.5 \times 16$$ $$= 17 \times 8$$ $$= 34 \times 4$$ $$= 68 \times 2$$ $$= 136$$	perform mental calculations, including with mixed operations and large numbers*(and decimals)* Partitioning $$7.2 \div 3 = (6 \div 3) = (1.2 \div 3)$$ $$= 2 + 0.4$$ $$= 2.4$$
		identify common factors, common multiples and prime numbers Use a variety of resources (including a calculator) to investigate common factors, common multiples and prime numbers. Make models and images to display facts. Investigate the patterns within the numbers.	identify common factors, common multiples and prime numbers Use a variety of resources (including a calculator) to investigate common factors, common multiples and prime numbers. Make models and images to display facts. Investigate the patterns within the numbers.
practise addition for larger numbers, using the formal written methods of columnar addition (see Appendix 1) Extend the use of compact column method to adding several numbers with_mixed decimals. Children should be reminded of the importance of aligning the columns accurately. Where there is an 'empty' space in a decimal column, pupils could insert a zero to show the value.	*practise subtraction for larger numbers, using the formal written methods of columnar subtraction (see Appendix 1)* Column Subtraction with decomposition Including decimals Revision of formal compact column method extending to more complex integers and applying to problem solving using money and measures, including decimals with different numbers of decimal places. Align the decimal point when setting out calculations. Use *'place holders'* to aid understanding of the value in that column. 	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of short and long multiplication (Appendix 1) Short multiplication and Long multiplication as in Year 5, but apply to numbers with decimals. Pupils may need reminding that single digits belong in the ones (units) column. A sound understanding of place value and the formal method itself are required before progressing to decimal multiplication.	divide numbers up to 4 digits by a two-digit whole number using the formal written method of short and long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context (Appendix 1) Short division Long division (for dividing by 2 digits) **Remainders** Quotients expressed as fractions or decimal fractions $$61 \div 4 = 15\tfrac{1}{4} \text{ or } 15.25$$
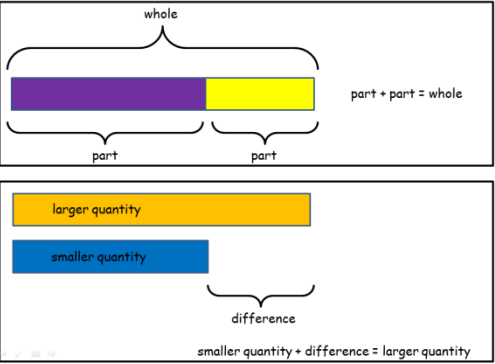

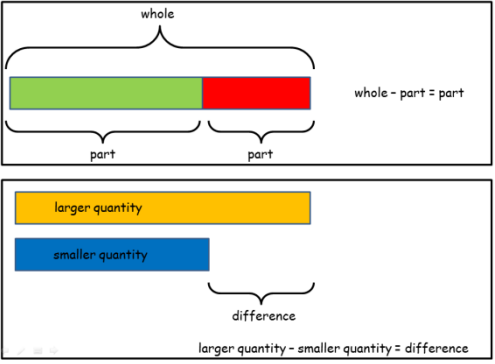

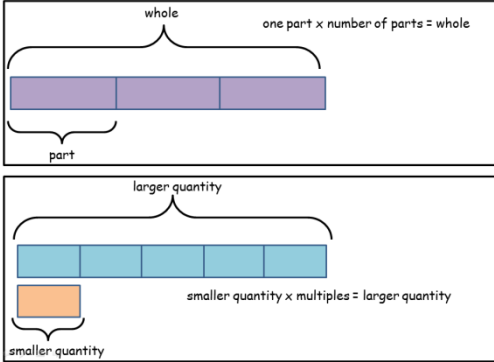

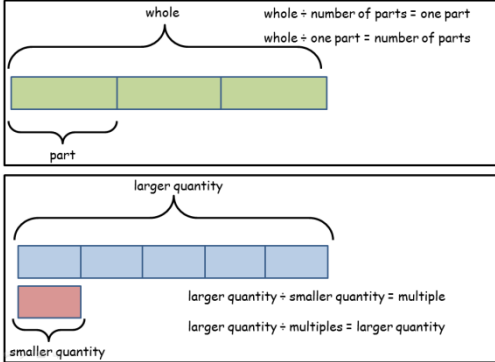

solve addition multi-step problems in contexts, deciding which operations and methods to use and why	solve subtraction multi-step problems in contexts, deciding which operations and methods to use and why	solve problems involving multiplication	solve problems involving division
